Town Council Has A Quiet Session

Commission Authorities Signing
Of Gas Franchise

A quiet session of the town council was held last Monday evening with Mayor Worts and councillors Layelle, Sangster and Smith present.

A letter was read from the utilities commission, authorizing council to sign agreement between the Town and the Canadian Western Power and Fuel Co. for renewal of franchise as result of vote of burgesses.

A letter was read from Dept. of Lands and Mines giving a report of conditions of gas wells in town and the engineers reported that wells on the whole were in good condition and that suggestions made after last inspection have been carried out fairly satisfactorily.

The representative of the Underwriters association wrote council giving report of recent inspection. The report was received and filed.

A check was received from the Alberta Pottery Co. for purchase price of the building now occupied by them and the Mayor and secretary were authorized to issue transfer of the property.

Here and There

Popularity of Canadian apples abroad has notably increased, and last year apple exports to Europe from Western Canada reached a new high record of 1,174,000 boxes, as compared with 560,000 boxes in 1930. Fruit growers are anticipating an even larger crop this year.

R. T. Dandaneau, formerly Traveling Passenger Agent, Canadian Pacific Railway, Winnipeg, was appointed District Passenger Agent, Algonquin District, North Bay, Ont., effective August 16th. Mr. Dandaneau has had a long and successful career with the company, and is now receiving congratulations on his most recent promotion.

Numbers of anglers returning from Ottawa and Montreal report having experienced exceedingly good bass fishing. This was the expression of a group from Cheltenham, Ohio, who recently visited the bass fishing waters of the Ottawa River, north of Maniwaki, according to C. O. Seymour, General Tourist Agent, Canadian Pacific Railway.

This is evidently the year with potatoes. One would judge from the reports emanating from various parts of the Laurentian and Gatineau districts of Quebec, according to C. O. Seymour, General Tourist Agent, Canadian Pacific Railway, that every locality produces, as the rutted groves and Franklin groups are best known, are very plentiful. Most crops hatched this year are nearly full grown.

New freight rates on live stock with minimum weights to meet the competition of motor trucks in the transportation of animals to market have been put into effect by the Canadian Pacific and Canadian National Railways, covering movement from stations within a radius of 100 miles of Toronto, and these were effective from August 1st. The new rates are being tried out as an experiment, and it is expected they will result in a very substantial increase in the rail movement of cattle, sheep, and hogs.

One of the most interesting passengers arriving in Montreal by the Canadian Pacific 681, Duchess of Richmond, on August 13 was "Miss England III", the world's fastest motor-bus. After the international races with Gar Wood's bus at Detroit, Mary Don will take "Miss England III" to Toronto, where she will take the Canadian National Exhibition will be able to see at almost by powerful means to lower her own or any other new world's record. The big speed bus was accompanied in the Duchess of Richmond by R. S. Gurner, a well-known Canadian, and "Miss" to Kays Don along the route.

Gravelling Highway From Bowell to Town

Will Also Re-face Highway East
To Medicine Hat

During the past week a gravelling gang has been at work gravelling the highway between Bowell and here. The gravel is shipped in by train from Crowfoot and taken from the cars in large trucks. This work will be completed this week-end after which the highway east from Redcliff to the top of the hill will be re-faced. More re-facing will be done at different points west before winter sets in.

With the completion of the stretch between here and Bowell gravelling will be completed on No. 2 highway all across the province.

Former Redcliff Girl Passes at Vidora

Spent Most of Her Girlhood
Days in Redcliff

News has just been received announcing the death of Mrs. Alexander close to her home in Vidora Sask. on July 8th. Deceased whose maiden name was Thora Nellie Zeigler, formerly of Redcliff, was in her 22nd year and spent most of her girlhood here. On July the last 1930, she was married here by Mr. Alexander Close and after her marriage went to Vidora where she resided until the time of her death.

Besides her husband deceased leaves two small children, a boy and a girl, to mourn her loss. Deceased joined the Church of the Brethren in 1924 and was always a faithful servant and enthusiastic worker.

School opened Thursday after the summer holidays with the same teaching staff as last year. The attendance in both public and high school is practically the same as at year. In the high school exactly the same number of pupils are registered.

Quite a few from town are going to Lethbridge Saturday.

Churches

Drumheller Touring Team Coming Here on Monday

Will Play Redcliff All Stars in
Afternoon at 8 O'clock

Just before going to press word was received in town that the touring Drumheller football team would be here to play a game with the Redcliff all stars on Monday afternoon next at 3 o'clock.

As next Monday will be a holiday it will be a good opportunity for all to see the game.

It will be remembered that when this touring team played here a few weeks ago the fans were treated to one of the best games of the season, with the locals defeated the visitors by a goal to 0. As Drumheller is anxious to have another try with Redcliff the game Monday should be well worth seeing.

Admission to the grounds will be 25c. Be sure to get your tickets early and don't miss the game.

LOST—a \$2.50 gold coin. As coin was a keep sake owner would appreciate it. If finder would leave same at the Review office.

The Ladies' Auxiliary to the local Legion will meet at the I. O. O. F. hall on Wednesday afternoon next at 2:30. Mrs. J. Hope will be the hostess.

Owing to the trouble with our type setting machine the Review was delayed considerably in getting to press this week. However with the assistance of several willing mechanics we got it going again.

Mrs. C. Newham and boys returned home last week-end from a visit to friends in Calgary. Mr. and Mrs. Cornish accompanied them by car from Calgary.

MARKETING BOARD WAS NOT PRESSED

The essential and vital thing requiring attention regarding the marketing of the 1932 crop is to take steps, if necessary, to see that prices are not unduly deflated through hedging pressure that is inevitable during the next two or three months, declared Premier Brownlee on his return from Ottawa where he conferred with Premier Bennett and Pool officials regarding marketing of the crop.

BRITAIN IS PAYING DEBTS ON TIME

With the repayment of 2,500,000 francs to France on September 10, the United Kingdom will have repaid in full the entire amount of foreign credits obtained by the treasury in the financial crisis of September 1931.

The whole of the United States credit was repaid by the treasury in March and April.

Mr. Joe Schille, of the Imperial bank staff, returned from his holidays yesterday. He reports a pleasant vacation.

As next Monday will be Labor Day and a public holiday in all Canada the stores in town will be closed for the day.

An unusual display of northern lights in the sky last Sunday night drew the attention of a number of wondering citizens in town. The display had the appearance of a large ribbon band stretching from north-west to south-east forming a complete arch over the town. Later it settled down on the north-western horizon assuming the more familiar appearance.

Partial Eclipse of Sun Was Seen Here

Commenced About 11:45 And
Lasted Till 12:25

Scientists from all over the world were in Quebec yesterday to witness the eclipse of the sun which could be seen at its best in parts of that province.

A partial eclipse was plainly visible here with the aid of old films and smoked glass. The shadow of the moon on the sun began about 11:35, working on from the top until it was about 40 per cent. covered at this point and was cleared again at 12:25.

The eclipse caused many to brush up their memories as to its cause; the distances and comparative sizes of the earth, the moon and the sun. The moon, which is 2,100 miles in diameter and 238,000 miles from the earth, passed between the earth and the sun. The sun is 92,897,000 miles from the earth and is 864,000 miles in diameter. The diameter of the earth is 7,927 miles.

\$8.00 Contributed For Navy League

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of the merchant marine, Redcliff citizens subscribed \$8.00 to this cause in a recent campaign conducted here by Fred Cooke, organizer of the Alberta division. The Sailor magazine, published quarterly, may be obtained by the payment of \$1.00 per annum in addition to your donation to the funds. The regular fee for the magazine is \$2.00 per annum.

Subscriptions may also be sent to V. J. Ward, secretary of the Alberta Division, whose address is 2140 Sixteenth street west, Calgary.

Legion Wins Out In Bennett Shield

Defeat Diamond D's by 1 Goal
To Nothing

By defeating the Diamond D's last Tuesday evening the Medicine Hat Legion won the right to represent this district in the next round of the Bennett shield competition. A nicely placed ball from Page connected with Appleton's toe towards the end of the second half and landed in the corner of the net for the only goal during the game.

If anything the Legion had a slight edge in the play during the first half, but for the opening ten minutes of the second period and towards its close the Diamonds had considerably the best of the argument but they could not score and it is goals that count.

On the whole the fans were of the opinion that from start to finish it was anybody's game. From the start of the second period it looked as though the Diamonds would score any minute but several golden opportunities were lost and as many more hard luck shots just missed the goal mouth. With the saves made by the Legion goalie were most disheartening for the Diamonds and their supporters.

This was the fifth attempt between the two teams to settle the district winner in the Bennett shield; the other four ending in draws.

The Legions go to Lethbridge on Saturday to play the next round for the shield with the team of that city.

Miss Helen Hill, of Medicine Hat, spent a few days in town last week the guest of Miss Grace Maskell.

The Gas Co. is having the west well cleaned out preparatory to making other improvements on it.

Mr. J. E. Tarrant is back in his place in the town hall after a two week's vacation spent at Waterton Lakes and other mountain resorts.

Mrs. Tremblath and Velma Jean returned last week-end from B. C. points where they had been visiting for the past month.

Mr. Samuel Miller, formerly of Redcliff, died suddenly at his home in Los Angeles, on Aug. 24th. He was 72 years of age. Mr. and Mrs. Miller and family left Redcliff for the south in 1919.

Mrs. J. Moran, daughter of Mr. and Mrs. P. Lavelle of this town, is at present in the hospital in Rochester undergoing treatment for internal trouble. Latest reports are most hopeful for her recovery.

Initial payment for Alberta Pool wheat for the 1932-33 crop year has been set at 35 cents per bushel, it was announced today. The basis is No. 1 Northern, Vancouver. Lists of prices for carlots and street wheat are being sent out to various stations in the province.

The 40th Anniversary of

"SALADA"™

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Lessons Of The Depression

A cabinet minister in one of the prairie provinces has expressed the view that the present business depression in this country is "a blessing in disguise" because it is teaching people many lessons which it is in their own interests and in the interests of the country at large they should learn.

While one can agree that many people are learning some rather hard lessons these days, taught in the school of bitter experience, we are hardly prepared to go so far as to regard such experience as "blessings" even if it is disguised form. The men and women out of work in cities and towns, and the farmers who have suffered complete crop failure year after year, and who have not been able to market such meagre crops as they may have succeeded in raising at a price above the cost of production, and both of which groups have, of necessity, been forced to sue on Government and Municipal relief, and go deeper into debt for that relief, fall to see where the "blessings" come in.

But it cannot be denied that some valuable lessons are being learned, hard and bitter though the experience of learning those lessons may be. And if these lessons are thoroughly learned, taught to heart and not forgotten when the difficult days of the present have passed, and the hardships of the present will not be all lost; there will be some profit in future years.

Quite a few people, for example, have learned to appreciate the value of having a little something in reserve, something laid by for a rainy day, as the old adage puts it, or, perhaps, on the prairies we could more appropriately say, for a dry year. The mistake of spending up to the last dollar of one's income in years when they had income, has been impressed upon thousands of people, and it is probably safe to predict that, when once again these people are in receipt of incomes in excess of their actual living requirements, they will lay something aside by small instalments from their weekly wages or annual farm operations.

Governments, too, have probably had the lesson enforced upon them that they likewise must accumulate reserves in years of prosperity to tide themselves and their people through the lean years, rather than, as in the past, embark on large spending programmes when revenues are large and easy to collect. Public debts should be reduced in good years, because they are bound to rise in bad years. When times are generally prosperous, Governments can afford to hold off large programmes of public works and construction, and proceed with them when general employment declines and it is necessary to provide work.

Governments and large industrial employers of labor, it is to be hoped, have also learned to appreciate the fact that they have an obligation towards all the people on the one hand and their own employees on the other, and that the profits accruing to industry in good years must not, in the future, be all distributed in dividends to shareholders, or held in reserve to pay dividends when business drops off, but that an adequate percentage of those profits must be set aside in some form of unemployment insurance in order to provide protection for the workmen who assisted to create those profits. In future labor in industry must be protected just as effectively as the shareholders in industry. Many large concerns realize this, and even welcome it, but it is the duty of Governments to see that it is universally adopted.

Another lesson that is being learned is the wisdom of putting all one's eggs in one basket, quite another old proverb. In good times many business men have re-invested all their profits in expanding their businesses far beyond the needs of normal years. They have acted as if "boom" conditions would always prevail, with the result that when business declined they had phantoms on their hands, with heavy overhead expenses which it was impossible to carry under decreased business conditions. The same thing can be said of many farmers. When crops were good and prices high, they bought more and yet more land, more machinery, more everything, frequently borrowing large sums to enable them to do these things. Then with smaller crops and lower prices they found they could not make money, could not pay their debts, while if they had sold some of their former profits in reserve instead of trying them all in one-sided bets, which cost them more than they realized, they could have carried on without much worry.

Lack of ready money in this depression has taught many of us how to really economize; how many things we can do for ourselves if we will; how many things we actually do not need which we formerly thought we must have. A list of such things, each perhaps small in itself, could be given that would fill this newspaper column. And we are actually better off for the doing of things for ourselves instead of having someone do them for us. Some readers may think we are advocating a lower standard of living. Not at all. The standard of living in this country should mount steadily higher and higher. The difficulty is that we have confused what is essential to a high standard of living and what is not. Some things are essential to such a standard, but many things we have regarded as essential are not; rather they are pure luxuries, and these we should do without until we are well able to afford them. They should never be purchased until some reserve has first been accumulated.

Less meanness; less waste and extravagance than in the past; continued economy in the matter of non-essentials such as we have been forced to practice recently; the building up of some reserve—these are requirements for the future; they constitute some of the lessons of the depression.

Might Try Again

The following correction appeared in a small town paper:

"Our paper carried the notice last week that Mr. John Doe is a detective in the police force. This was a typographical error. Mr. Doe is really a detective in the police force!"

Summer Complaint

"I have used Baby's Own Tablets the best of all children's medicines. Summer Complaint, Colic, Teething and Constipation," writes Mr. George Walker, Thompsonburg, N.S. Certificate of SAFETY in use 26 months. More than 1,200,000 sold since 1911.

Dr. Williams' **BABY'S OWN TABLETS**

An Interesting Document

OM Trading House Rules For Women

In 1648
A document recently brought to Tippecanoe, from one of the northern trading posts of the Hudson's Bay Company, dated back to 1648, shows the following provisions relating to women.

Marriage—Throughout the country, in the absence of clergymen, civil factors only shall recognize marriages, and no person shall be permitted to take a wife at any establishment without the sanction of the gentleman superintending the district.

Employment for the women and children—In the course of the week due attention shall be bestowed to furnish the women and children with such regular and useful occupation as is suited to their age and capacities, and best calculated to suppress vicious and promote virtuous habits.

Education—As a preparation to education, the women and children at the several posts in the country shall be addressed and habituated to converse in the language (whether French or English) of the father of the family, and that he be encouraged to devote a portion of his leisure time to their instruction as far as his own knowledge and ability will permit.

Contribution To Science

Report New Scientific Discovery Made By Curie Family At Paris

Mme. Marie Curie's family has made a new contribution to science. The discovery of a ray stopped more easily by copper than lead has been reported in Nature, British Journal of pure science.

Irene Curie, daughter of the famous woman scientist, and F. Joliot, the daughter's husband, report the discovery and say this ray is "probably a beam of neutrons, almost if not quite as penetrating as alpha rays, but it is called a new 'ultra-soft' particle' of matter. The discovery offers light on the possible nature of neutrons.

Perkins Balm is a true elixir of youth. Softens and beautifies the skin. Makes hands flawlessly white and smooth. Corrects and perfects skin distinction. Delightful to use. Delicately fragrant. Softens and irritates skin. Corrects and preserves. A flawless toilet requisite for the refined woman. A true skin beauty.

Canadian Salmon

Canada Leads in Canned Salmon Imports of Great Britain
Canada in the first six months of 1932 has definitely maintained the leadership in the canned salmon import to Great Britain, which was valued at \$1,007,264 of the first six months of 1932, the total import of \$2,166,032 pounds, and Canada was second with 4,603,900. In 1931 Canada exported first place with 9,060,554 pounds, and United States was second with 7,140,467. This year Canada sent \$891,900 and United States \$377,724.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the inflamed bronchial passages and bring about a healthy condition. It always relieves and its continued use offers a permanent cure. "Why not try this long-acting remedy today and commence its use?" inhaled as smoke or vapor it is equally effective.

Beaching With Ducks.
Nature is being assisted in keeping up the supply of wild ducks for the sportmen of Manitoba. Right there young wild ducks have been hatched in incubators and are now learning to swim in the waters of Lake Winnipeg. Eggs were gathered from the lake and the birds were hatched by artificial means. The present has been so successful that it is proposed to hatch 10,000 in this way next year.

The Same Name
A woman entered a small store with her small daughter. Seeing some trifles in the refrigerating case, the little one asked what it was.

"Trifle" said her mother.
"That's funny," said the child. "They say that's what we get over the radio."

The woman who marries a man because she is sorry for him is apt to be sorry for herself later on.

A pinch of grease will keep shad from sticking.

The glass of phosphorus is due to slow oxidation.

End Of Reparations
Conference At Lausanne Marked A Great Step Forward
To speak of the Lausanne Conference as if it were a European conspiracy against the United States is totally wrong. Lausanne marked a great step forward. It showed the European nations have returned to sanity, after all the madness of war and post-war nationalism. Because the Lausanne settlement, with money or later being the United States a reconsideration of war debts, that laudable result is not brought about by the desires of the Lausanne negotiators but only by their mutual recognition of their helplessness in the face of existing conditions. —Winnipeg Tribune.

Quite At Home In Air
New York Girl Flies Regularly To Southern Hemisphere
Flying over five countries while commuting between New York and Puerto Rico, Miss Clara Livingston at the controls of her own "plane" makes a solo flight of some 2,000 miles several times a year as casually as most women drive their automobiles. To town. Having inherited a plantation in Puerto Rico, Miss Livingston, whose home is in Jamestown, N.Y., finds air transportation the most efficient aid in helping her attend to her business and widely separated interests. She is one of the few women who fly Latin America.
Her arrival at Miami brings out as many government officials as would a steamship, as she must be cleared by the customs officers, the health officer, the immigration officer, and the plant board.

French Talk To Air
Private Pilot's License Shows Big Increase This Year
French citizens are taking to the air for their own pleasure in greater numbers according to the increased number of private pilot's licenses granted by the French government during the year ended March 1932, which totalled 465 as compared with 151 during the same period of last year, states a report from Amstam Trade Commissioner H. C. Schmitt, Paris, France.

Why We Were Married, darling, the hours would roll by without our noticing them.
She: "Do you mean we probably wouldn't be able to afford a clock?"
France is the principal world source of diamonds, from which aluminum is derived.

New Question Raised
U.S. Customs Asked To Refund Duty Charged On Goods Made At Sea
The United States Supreme Court was asked to decide whether customs duties can legally be imposed on articles produced on the high seas. The question was raised by the Proctor and Gamble Manufacturing Company of Cincinnati on the impetration of whale oil used in the manufacture of soap.
Under protest it paid a duty of six cents a gallon on the oil, taken in the Hous Sea by Norwegian seamen under contract and brought out to recover the money.
The trial court held that ships at sea and the property in them are a part of the country to which the ship belongs and that the whale oil was taxable as coming from Norway.
It Will Prevent Ulceration Throat—At the first symptoms of sore throat, which presages ulceration and inflammation, use the powerful Throat Electric Oil. Add a little salt to it to make it palatable. It will slay the irritation and prevent ulceration and swelling that are so painful. Those who were previously subject to quinsy have thus made themselves immune to attack.

Practically His Own Doctor
Prince Of Wales Has Preceded By Month Advise
The Prince of Wales has become his own doctor—to a certain extent—according to his own testimony before the British Medical Association.
"I have had no special advice," he told the learned physicians, "and have so learned like many others how to keep myself fit—that I have to some extent become my own doctor. The doctor he added, "is certainly our first friend in life and our last."

The Japanese government is considering spending \$10,000,000 in buying more private railways.

Thousands of MOTHERS ARE GRATEFUL

"... I wish I had known about Baby's Own Tablets so many months before I saw it was the mother's friend. Our new baby Wales took only one or two for relief from a cold. Baby Wales and I will be well and happy for ever."

The Boston Co., Ltd., of London, England, has been successful in securing the right to use the name Baby's Own Tablets in Canada.

Son Of Charles Dickens
Sir Henry Dickens, K.C., only surviving child of Charles Dickens, the novelist, is retiring from the position of Common Sergeant of the City of London, England, which he has held for 15 years. In his office he sits constantly as a judge at the Old Bailey. Sir Henry, who is 84, is the oldest judge still upon the bench.

Sweet and palatable, Mother Graver's Baby's Own Tablets are for children, and it does its work sure and promptly.

Glasgow, Scotland, is to have a new 11,400,000 hospital.

A Time For Careful Thought

Unless he formulates and follows a new economic i-
s, is only a question of time until the farmer as a self-
respecting freeman will take his place in the museum of
vanished types. In this new economics the principles of
co-operative action will play a decisive role.

If the farmer is to cease being the beaten and
buffeted victim of modern industrial civilization, if he
is to become the master of his own economic and cultural
destiny, he must organize as the rest of economic Canada
has organized. If he does not he will be lost in the
shuffle.

The Alberta Pool Elevators represent the foremost
step in the co-operative efforts of Alberta farmers.
Every Alberta grain grower should see that this Alberta
co-operative organization is assured the greatest possible
measure of success.

Family partnership in banking

A very real service is offer-
ed by joint account priv-
ileged. Two people may
cheque and deposit through
one account, and this
makes a very convenient
family banking arrange-
ment.

Any Branch of the Bank will
be glad to open joint accounts
and explain details.
